4 October 1966

MEMORANDUM FOR: Comptroller, OSA

SUBJECT: Technical Representative Requirements

1. There has been considerable discussion and, apparently, much confusion remains on the subject of Itek Tech Rep support of the Delta III cameras. This memorandum attempts to clarify the situation.

2. There are presently three Delta III configurations in the inventory. With the delivery of two new cameras by the end of November, this quantity will be increased to five. If an operational requirement still exists for these cameras, Itek maintenance technicians are required to maintain them.

25X1 4. This project has, in a sense, been operating from three locations since February 1966. This was brought about by the loan of a Delta III camera, spares and contract maintenance support for use by the Air Force at [REDACTED]. This resulted in placement of Delta III equipments and personnel at [REDACTED] Detachment G and Detachment H, with the personnel at [REDACTED] being rotated every thirty to sixty days. This type of operation has more than proven the need for the [REDACTED] technicians [REDACTED] were required at each location at all times, with the [REDACTED] being required to maintain team integrity, in the event a regular team member was absent for reasons of sickness, leave or compensatory time off.

25X1

25X1 5. The reduction in numbers of technicians for support of the Delta III equipment, [REDACTED] would immediately constrict the dual staging capability with this equipment and would impact unfavorably on the maintenance support of either Detachment "G", "H" or of [REDACTED]. As OSA has been committed to support [REDACTED] this would leave one maintenance team to support Delta III equipment at Detachments "G" and "H".

25X1

25X1 6. As long as the mission directives remain as they are and OSA is required to support Air Force at [REDACTED] the requirement for [REDACTED] technicians will continue.
